

# **International Perspectives on Geographical Education**

## **Series Editors**

Clare Brooks, UCL Institute of Education, London, UK

Di Wilmot, Education Department, Rhodes University, Grahamstown, Eastern Cape, South Africa

This series is under the editorial supervision of the International Geography Union's Commission on Geographical Education. Led by the priorities and criteria set out in the Commission's Declaration on Geography Education Research, the series plays an important role in making geography education research accessible to the global community. Publications within the series are drawn from meetings, conferences and symposiums supported by the Commission. Individual book editors are selected for special editions that correspond to the Commission's ongoing programme of work and from suitable submissions to the series editors. In this way, research published represents immediate developments within the international geography education community. The series seeks to support the development of early career researchers in publishing high quality, high impact research accounts.
